

Entrust DuraShield™ clear overlay

HIGHLIGHTS

The durability you require at a cost you can afford

Cost is no longer a reason for education, corporate, government, and other ID issuers to settle for less durable cards. Entrust DuraShield™ clear overlay delivers the phenomenal durability and affordability you've been seeking.

KEY FEATURES & BENEFITS

Revolutionary, affordable coverage

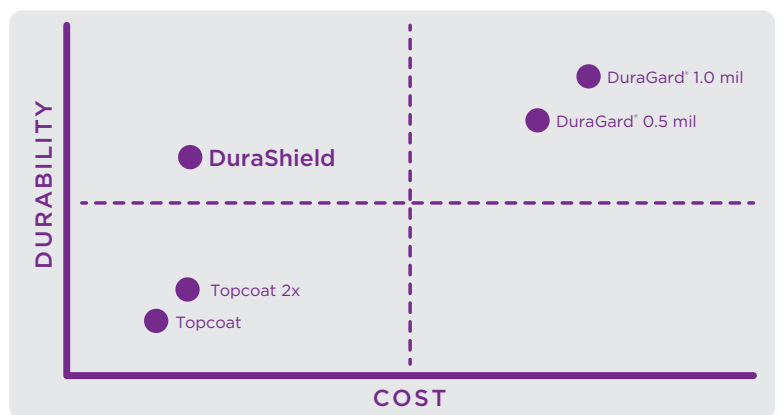

Entrust DuraShield clear overlay delivers phenomenal durability and affordability to ID card issuers.

- Combines long-lasting strength with exceptionally low costs over the life of the card
- Offers multi-year protection typically associated with premium products, making it as affordable as basic topcoats

Increased durability

Extensive research and development led to the invention of this clear, edge-to-edge overlay that provides a barrier against chemicals, moisture, and abrasions that can result in costly card re-issuance.

- Offers four times the protection of standard topcoat
- When used on recommended composite cards, offers unprecedented card life

DuraShield overlay far surpasses topcoats in strength, at a price that's far less than other high-durability overlays.

Entrust DuraShield™ clear overlay

Industry standard taber testing shows that DuraShield clear overlay offers far superior performance compared to standard topcoats and similar durability to high-end patches.

DuraShield - 2,000 cycles

1/2 mil patch - 2,000 cycles

Double topcoat - 2,000 cycles

Stronger security

Unlike clear polyester patches, DuraShield overlay provides a highly secure defense against card alteration with full edge-to-edge protection that is virtually impossible to remove intact. The durability and resilience of this overlay helps preserve the integrity of photos, text, and other critical ID elements.

Polyester patch coverage

DuraShield clear overlay coverage

DuraShield clear overlay comes extremely close to the performance of a polyester patch, but with far greater security and much better aesthetics.

Investment protection

DuraShield overlay features Entrust patented Intelligent Supplies Technology™ and eco-friendly biodegradable cores, and is certified to work with Entrust desktop laminating direct-to-card printers. Protect your investment in Entrust solutions by choosing only genuine Entrust Certified Supplies through authorized distributors.
